

Wiring Manual Revsticks Licenseplate Holder

You have 5 cables. 2 (black and yellow) from the licenseplate lighting and 3 (black yellow and red) from the back light and brake light.

You can put together the 2 black cables (one from the licenseplate lighting and one from back light). These are the ground (-).

You can put together the 2 yellow cables (one from the licenseplate lighting and one from back light). These are the normal lights (+).

The last red cable, you need to connect to the brake light.
